TOMY.

AURORA: REAL HOME RACING IS BACK.

you'll be impressed. Then take a look at the line up of the new Aurora racing sets.

Inside those great new packages, you'll find substance—and nothing but substance. Because there's plenty of that new track to

build real racing layouts. Plus new cars—some with working headlights. Plus features fundamental to racing fun: banked curves and lap counters, for example. How will this quality purist approach to home racing sell to today's kids?

Well, take a look at our television commercials. This is the sort of classic good TV that makes a kid say, "Buy me that, Dad." And for once the old man will readily agree. Because, when he was a kid, his name for home racing was—Aurora — The closest thing to real racing!

AURORA
TOMY

Let's face it: real, honest-to-goodness competitive home racing has always been known by a simpler name. Aurora. Now, TOMY Corporation brings back that famous name, along with its marketing position: THE CLOSEST THING TO REAL RACING. Real home racing is fun for kids of all ages, and has been for more than a quarter of a century.

It offers hand-eye coordination in a competitive play environment, which is a very learned way of saying that it never gets boring! That, in turn, may be the reason that owners of Aurora racing have always been good customers for additional cars and track. To put it succinctly: real racing is a lot of fun. That's why the accessories for real racing are a profitable year-round business.

The return of Aurora is a profitable alternative to licensed racing sets and gimmick racing sets. Most licenses aren't appropriate to racing sets; but even when they are, the appeal is often short-lived. Gimmick racing sets are designed for younger kids, which limits their market potential. A kid can't really compete on a gimmick set. More than two years ago,

TOMY Corporation acquired the tooling and the name of the old Aurora. So why did we take two years to bring the product line to market? The answer lies in what you already know about TOMY's reputation for precision engineering and quality manufacturing. We threw out most of the old tooling—and redeveloped the track

from scratch. Take two pieces of the new Aurora track; put them together, and pull them apart. The astonishing ease of that simple operation will convince you that it was indeed worth waiting for the new Aurora. Next, examine any of our AFX® Turbo racing cars. They're entirely new. Test them for speed and handling. We know

No. 8601

CAMARO CHALLENGE™
