AURORA® AFX™ ELECTRIC HO SCALE RACING

FEATURING magna-traction™ cars FOR SUPER GRIPPING POWER

Aurora, world leader in Model Motoring since 1960, continues to set new standards of excellence with AFX—

Aurora announces for 1975, a new technical breakthrough! New AFX cars with Magna-Traction ...
...unmatched for speed, control and performance—right out of the package!
...have super gripping power—they hold the track better than any other electric racing car around!
...run so fast they leave the others on the line!
...stay on the steepest turns and hug the steepest banks!

The secret of Magna-Traction is powerful magnets built into the chassis which provide a super grip for super speed and staying power.

AFX electric HO racing sets, now as never before, provide unequalled control, performance and value.

Plus a host of exclusive major features:

- ...AFX Speed-Lok™ High Performance Track
- ...AFX Russkit Pro-Style Speed Controls
- ...AFX Safety Wall-Pak™
- ...Lap Counter
- ...Automatic Starter Track
- ...Lap Timer
- ...and New Revomatic™ Grandstand Dual Sound Unit.

These features are only part of the world's largest selection of H.O. track and accessories.

All backed with Aurora's guarantee of quality and performance.

With over 65,000,000 Aurora H.O. electric cars manufactured since 1960—it's easy to understand why AFX Model Motoring outsells all the others combined by more than 2 to 1.

Jackie Stewart says,
"AFX is the closest thing to real racing."
