

IMPORTANT - NEW TRACK MUST BE CLEANED PRIOR TO ASSEMBLY

TRACK PREPARATION

- Always clean the metal track rails each time you assemble your track, using the special tool provided. Failure to do so will result in your cars running erratically
- Blow on the track to remove any deposits that may have fallen into the grooves.
- You may also use an eraser or a coin to clean the track rails as shown in SETTING UP YOUR AFX VERTIGO.
- **NEVER** use steel wool to clean the track.
