# SUPER G-PLUS<sup>®</sup>

**THE FASTEST PRODUCTION  
HO SCALE RACE CARS EVER!**

As the world's fastest HO scale racers, our new Super G's are competition engineered to break track records at lightning speeds and with phenomenal handling. Each new Super G-Plus car features a monocoque chassis, brass armature bearings, and endurance proven commutator brushes for superior durability. A prize for the driver who demands the ultimate in performance from a race car.

Revolutionary new G-Plus cars... Gravity Plus More... utilize the motor's magnetic field plus flux collectors to greatly increase traction. Result: greater acceleration and stopping power... plus a dramatic, up-to-30% reduction in lap times. Designed for speed, the monocoque style motor is the most modern in-line ever developed. Using part of the chassis for support, it features brass bearings and bullet-proof commutator brushes which require less power and therefore, produce less heat for cooler running. No tools necessary for assembling or disassembling the new Aurora® G-Plus cars—maintenance is super-simple. For handling: Special reverse taper steel guide pin, independently rotating front wheels, trued sponge slicks—all built with the finest detailing ever. The G-Plus car gives you Pro Status.

# MAGNA-SONIC<sup>™</sup>

## SOUND CARS

Our new Magna-Sonic<sup>™</sup> cars combine all the speed, control, and high performance of Magna-Traction cars with the realistic sound of powerful racing engines built right into the chassis. Magna-Sonic sound cars are the first HO scale racers with an independent, self generating, sound system to bring a dramatic new level of authenticity to AFX and further strengthen our position as the "closest thing to real racing".
