AURORA INTERNATIONAL CATALOGUE 1981/2(han:plaatje van de catalogus)

During the last couple of weeks various collectors have asked me questions about this catalogue and especially about the cars.

Most frequent question is about the black 1798 BMW TURBO in black. This is a handmade sample and has never been produced, the final version is the BMW in red. More cars in this catalogue are handmade samples like the ALITALIA CAPRI and CASTROL RALLY ESCORT, final production cars have a slightly different colour scheme and different numbering. Second on the list of questions is about the SALAZAR WILLIAMS 1837, according to my records this car has been produced in Singapore, however I only have seen the handmade model.

A well-known collector from the US, EDDIE CASEY, spotted the yellow Tyrrell ELF on page 15 with the lapcounter. He asked about the red car on page 26, superturbo Monaco with number 9.

I realized that not too many people know about these superturbo cars, because we dropped these direct after 1981 Neurenberg toy fair. The pages were only printed in a very limited edition of 100 copies to be used at fair.

Only the sp Monaco and sp atlantic were new models.

Han hier foto van de atlantic car, deze is van afgelopen zaterdag,
