

Which Mega G+ cars can make it through the AFX loop on a track? This list checked stock MG+ cars actually running on an 8' oval test track with a loop in the middle of the straight. Note, your results may differ from this list. Making it though the loop depends on numerous variables: speed, magnet strength, front and rear overhang of the body, length of straight track leading into the loop and tire height.

| <b>Mega G+ 1.5</b> |                           |      |  |               |                         | Loop? |
